

Award Nomination Instructions

Submit your award nomination packet using the [online award nomination form](#). After clicking submit, the nominator will be sent an email confirming we have received the award nomination packet.

Each packet must include the following in order to be considered for an award:

- One Nominator's Letter*
- One Seconder's Letter
- One Letter of Support
- Condensed Curriculum Vitae of Nominee

Nomination packets must be received in the ASBMR Business Office by **Friday, May 6, 2016**. If you would like to update a nomination of a candidate previously proposed please contact the ASBMR Business Office at asbmr@asbmr.org. Nominations of candidates previously proposed must be submitted to meet the same deadline **Friday, May 6, 2016**.

Please include the following information for the respective award:

The William F. Neuman Award

- In priority order discuss major developments, seminal investigations, and major scientific observations with a brief general statement about why these were landmark achievements.
- Outline progression of the nominee's research over time. How has his/her research advanced the field? What are the long term ramifications of research in broad terms?
- What were the pioneering achievements of the nominee? Include examples of leadership on national and international levels; describe with specific examples that clearly indicate a level of leadership beyond the average for his/her peers.
- Describe with specific examples instances of recognition by peers.

The Fuller Albright Award*

- What distinguishes this nominee from his/her peer group?
- How has the nominee established himself/herself as a solid investigator at a relatively young age?
- What are the current and anticipated impacts on the field from his/her research?

*Any interruption in a candidate's career as an independent investigator will be taken into account in determining eligibility.

The Frederic C. Bartter Award

- Outline the nominee's clinical studies/achievements and the progression of his/her scientific/clinical investigations through time.
- What are the wide ranging applications to the bone and mineral field and to the public at large?

The Paula Stern Achievement Award*

- Provide an established record of peer-reviewed Federal or private research grant funding as Principal Investigator (PI) or as a co-investigator/project leader with a significant role on multi-project/collaborative grants.
- Provide a distinguished record of publications in bone and/or mineral research.
- Describe the nominee's record of supervising junior researchers and commitment to mentoring the next generation of women researchers.

*Any interruption in a candidate's career as an independent investigator will be taken into account in determining eligibility.

The Louis Avioli Founders Award

- Outline the nominee's basic research achievements and explain why these are landmark achievements.
- Outline the progression of his/her scientific investigations over time.
- How has his/her research advanced the field? What are the long term ramifications of research in broad terms?
- What are the wide-ranging applications to the bone and mineral field?

The Gideon A. Rodan Excellence in Mentorship Award

- Provide some general background to the nominee's commitment to fostering mentorship and indicate why that commitment is outstanding.
- Describe with specific examples instances where the nominee helped promote the independent careers of young investigators in the field.
- List names and affiliations of young investigators or former young investigators who were mentored by the nominee.

The Lawrence G. Raisz Award

- Outline the nominee's record of outstanding achievements in preclinical translational research (cellular or in animals) in the bone and mineral field.
- What are the wide ranging applications to the bone and mineral field?

NEW - The Steven M. Krane Award

- Outline the nominee's record of outstanding achievements in basic, translational or clinical research in inflammation and/or skeletal matrix biology.
- What are the wide ranging applications to the bone and mineral field?

The Shirley Hohl Service Award

(NOTE: Please see the Society's complete [Mission](#) statement prior to submitting this award.)

- Provide some general background to the nominee's commitment to service and indicate why that commitment/service is outstanding.
- State how the achievements of the nominee have met specifically one or more of the stated goals of the ASBMR mission. In what way(s) have these been met above and beyond the call of duty?
- Has the service reached the public at large, other scientific groups, or allied organizations?
