**Thursday, November 21**

**DXA Calculators and FRAX**

*William Leslie, MD, MSc*

**Thursday, December 19**

**How to Start an FLS Program**

*Cynthia Emory, MD, MBA*

## OUR ECHO PROGRAM:

The Own the Bone® Orthopaedic Bone Health ECHO® aims to grow and share bone health knowledge and skills among orthopaedic providers in order to reduce the incidence of fragility fractures and positively impact bone health treatment. Each month, a panel of experts will host participants on a videoconferencing platform (Zoom) to discuss current topics related to bone health and to initiate a dialogue around patient cases presented by participants. These teleECHO® clinics are multidisciplinary and interactive, so participants are encouraged to learn but also to share their knowledge and experiences.

*In order to support the growth of the ECHO movement, Project ECHO collects participation data for each teleECHO™ program. This data allows Project ECHO to measure, analyze, and report on the movement's reach. It is used in reports, on maps and visualizations, for research, for communications and surveys, for data quality assurance activities, and for decision making related to new initiatives.*
