

The American Society for
Bone and Mineral Research

ASBMR President

Bart Clarke, M.D.

Dr. Bart Clarke is a clinician and researcher with the Division of Endocrinology, Metabolism, Diabetes, and Nutrition at the Mayo Clinic College of Medicine in Rochester, MN.

Dr. Clarke's research program focuses on clinical studies of steroid-induced osteoporosis, transplant-related osteoporosis, age-related osteoporosis, primary hyperparathyroidism, hypoparathyroidism and metabolic bone disease. He has developed collaborative clinical research protocols covering these areas that have advanced the understanding of postmenopausal osteoporosis and other forms of osteoporosis, and given new insights into treatment options for bone and calcium disorders.

Prior to serving on the ASBMR Council as President, Dr. Clarke was President-Elect. He has been a member of the ASBMR Annual Meeting Program Committee and served as an ASBMR Councilor.
