

**SILVERBERG, Shonni J., M.D.** Professor of Medicine, Columbia University College of Physicians & Surgeons, New York, New York, USA

Place of Birth: Montreal, Canada

Education/ Training/ Positions: BA, Wesleyan University, Middletown, CT, 1976; M.D., Cornell University Medical College, New York, NY, 1980; Intern/Resident in Internal Medicine, The New York Hospital, New York, New York, 1980-1983; NIH Postdoctoral Trainee in Endocrinology and Metabolism, Department of Medicine, Columbia University College of Physicians & Surgeons, New York, NY, 1983-1986; Assistant Professor of Clinical Medicine, Columbia University College of Physicians & Surgeons, New York, NY 1986-1989; Assistant Professor of Medicine, Columbia University College of Physicians & Surgeons, New York, NY 1989-1995; Associate Professor of Clinical Medicine, Columbia University College of Physicians & Surgeons, New York, NY 1995-2001; Professor of Clinical Medicine, Columbia University College of Physicians & Surgeons, New York, NY, NY 2001-2011; Co-Director: NIH Postdoctoral Fellowship Training Program, Endocrinology & Metabolism, Columbia University College of Physicians & Surgeons, New York, NY, 2003-present; Professor of Medicine, Columbia University College of Physicians & Surgeons, New York, NY, 2011-present.

Honors and Awards: Alpha Omega Alpha, Cornell University Medical College 1979; American Medical Women's Association Award for Academic Excellence 1980; The New York Hospital House-staff Teaching Award 1983; Florence & Herbert Irving Clinical Research Career Award; 2 cycles with competitive renewal (7/87-6/89; 7/89-6/93); Herbert Irving Assistant Professor of Clinical Medicine, Columbia University College of Physicians & Surgeons, New York, NY, 1987-1993; American Society for Bone and Mineral Research, Young Investigator Award 1988; Author: American Society for Bone & Mineral Research Most Important Articles of 1<sup>st</sup> 25 Years, 2003; Boy Frame Award for Clinical Excellence in the Field of Bone and Mineral Research, Awarded at Annual Meeting of The American Society of Bone & Mineral Research, 2010.

Editorial Duties/ Peer Review Panels: Editorial Board: *Journal of Clinical Endocrinology & Metabolism*, 2001-2007; Journals reviewed for in last 5 years: *American Journal of Medicine*, *Bone and Mineral*, *British Medical Journal*, *Calcified Tissue International*, *Clinical Endocrinology*, *European Journal of Endocrinology*, *European Heart Journal*, *Journal of the American Medical Association*, *Journal of Bone and Mineral Research*, *Journal of Clinical Endocrinology and Metabolism*, *Osteoporosis International*, *New England Journal of Medicine*, *Stroke*.

Consensus Panel Member: National Institutes of Health Workshop on Asymptomatic Primary Hyperparathyroidism, 2002; 3<sup>rd</sup> International Workshop on Asymptomatic PHPT, 2008

Professional Societies: Diplomate, Internal Medicine, American Board of Internal Medicine 1983; Board Certified, Endocrinology and Metabolism, American Board of Internal Medicine 1985; Member: American Society for Bone and Mineral Research 1986-present; The Endocrine Society 1988-present; American College of Physicians 1990; American College of Clinical Endocrinologists 1996; Fellow American College of Clinical Endocrinologists 1996. ASBMR: Member 1986-present; Member Professional Practice Committee 2003-05; Women in Bone & Mineral Research Committee 2005-07; Co-Chair of the Adult Bone & Mineral Workshop 2004-2008; ASBMR representative: National Osteoporosis Foundation Inter-Specialty Medical Council 2005-2008; ASBMR Representative: Third International Conference on Management of Asymptomatic Primary Hyperparathyroidism, 2008.

Current Research: Primary hyperparathyroidism, skeletal responses to bariatric surgery, parathyroid cancer, and the parathyroid vitamin D axis.

Statement of Interest: ASBMR has been my professional “home.” It was the first society I joined after completing training (member since 1986). I have developed the leadership skills required to serve on ASBMR Council in my work both within ASBMR and with other organizations. I have served ASBMR on the Professional Practice and Women in Bone & Mineral Research Committees; served as Co-Chair of the Adult Bone & Mineral Workshop; and as ASBMR representative to the National Osteoporosis Foundation Inter-Specialty Medical Council and the Third International Conference on Management of Asymptomatic Primary Hyperparathyroidism. I have also gained leadership experience in my role as Trustee of Wesleyan University (2004-present; Chair of Academic Affairs, Student Affairs, Residential Life, Tenure & Promotions 2008-2011, Chair of Governance 2011- and member of the Board Leadership Committee 2008-present). I have also served for over a decade as Trustee and Vice President of Met Council in NYC, a social service organization addressing poverty issues and serving over 100,000 people annually, and as Trustee of The Dalton School in New York City (2005-2008).

As a clinical investigator and PI on many previous and ongoing NIH-funded grants in metabolic bone diseases, I am acutely aware of today’s challenges in obtaining research funding, and of the necessity to present our field consistently and forcefully to those who make funding decisions. My vision for ASBMR includes a major focus on how to best educate physicians, the public, Congress and the leadership of the NIH about the public health impact of our field. I am also mindful of the responsibility that ASBMR has for the future of our field. Mentorship of the next generation of clinicians and researchers in the field of metabolic bone diseases has been a primary focus of my activities. I am co-director of the NIH Postdoctoral Fellowship Training Program in Endocrinology & Metabolism (T32) at Columbia and currently hold an NIH K24 mentorship award. Thus, my vision for ASBMR also includes a focus on attracting junior investigators to our society and fostering their careers.

ASBMR is uniquely poised to advance the field of metabolic bone diseases in this difficult time. I would be honored to continue my service to ASBMR as a member of Council. My record of achievement in clinical research in bone diseases, my commitment to mentorship of the next generation of “boneheads,” my service to this society and the experience I have gleaned in positions of responsibility in other organizations have prepared me to serve in this capacity. There is much work to be done.

Disclosures: None.
